Counter Check

Nothing leaves the shop underpriced.

Counter Check reads a draft quote before it goes to the customer and catches what's missing or priced too low, in seconds. Built for service advisors and shop owners.

How it works

1. **Paste the quote.** Text, a screenshot from your shop system, or a link. No reformatting.
2. **Get a second look.** Missing items the job usually needs, labor or parts priced low, and whether it hits a real profit-per-hour target.
3. **Send it with confidence.** Fix what's flagged, or don't. Either way you know what was left on the table.

Works with

AutoLeap, Tekmetric, Shop Monkey, Protractor, or whatever you quote in today, including paper.

An example

58

2019 Honda Civic, brake job
Quote total $271.99. Capture score out of 100.

Front brake rotors missing	+$189
Brake fluid flush missing	+$119
Labor quoted 1.0 hr, job takes ~1.8	$140 → $252

Left on the table **$420**

An illustrative example, not a real customer's quote.

Pricing (CAD, or USD in the US)

Standard

$29.99 / month
about $19.99 USD
14-day free trial
